

Martin, Robert

Robert A. Martin is a principal engineer at MITRE, a company that works in partnership with the government to address issues of critical national importance.

For the past 18 years, Robert's efforts have focused on the interplay of risk management, cyber security, and quality assessment. The majority of this time has been spent working on the CVE, OVAL, CAPEC, and CWE security standards initiatives in addition to basic quality measurement and management. Robert is a frequent speaker on the various security and quality issues surrounding information technology systems and has published numerous papers on these topics.

Robert joined MITRE in 1981 with a BS and MS in EE from RPI. Later he earned an MBA from Babson College. He is a member of the ACM, AFCEA, IEEE, and the IEEE Computer Society.
